Have you ever been part of a challenging project? How many people were on your team? What was the most challenging part?

Talking about challenging projects (1/2)

 Read the paragraph about projects and pay attention to the information provided.

The most challenging project I was involved in was the Golden Gate Bridge Construction Program. I managed the project of construction of the towers that would support the bridge. There were three architects, six civil engineers, and 47 construction workers on my team. The most challenging part of the project was meeting the deadlines because several other projects were dependent on my project. Any delay in my project caused delays on the rest of the project. And the cost of a one-day delay was around \$80,000. This put significant pressure in the executive management team, and therefore, it was a big challenge for me as well.

Have you found Campus Live's dictionary useful?

Explain some of the vocabulary below used for teams and projects. Use the dictionary if necessary.

Parts of a successful project (1/2)

THE TEAM - The success of projects depends on teamwork. The team leader should support team members, and every individual needs to be a good team player.

You can:

lead / head (up) / run... a team

build / form... a team

join a team

work together as a team

team up with somebody = Work together with them.

be a team leader / team member / team player

Projects have a **schedule** (time plan) and a **deadline** (final date). You can:

fall behind schedule and then catch up

be on schedule

finish ahead of schedule

agree / confirm / set / extend... a deadline

meet / miss... a deadline

What other expressions can you use to make suggestions? Have you ever made a successful suggestion for a project?

Suggestions (2/2)

When we make a suggestion or recommendation in English we say:

I suggest..., I propose..., I recommend...

Are you **suggesting** we change plans? (We might clarify something.)

We'd like to **propose** a different solution. (We might signal we are going to talk about something.)

They **recommend** a change to the plans. (We might report what someone has said.)

How often do you send emails? What phrases do you normally use?

Complete the email with the options below.

Dear Clare,

I'm just emailing to update you ____ our new range of souvenirs.

At the moment, everything is going according ____ plan, and we've finished the rings and magnets. Just to ____ you know, we're also thinking ____ producing new posters of Atlanta, but ____ far we haven't contacted a photographer to take the pictures.

Best regards,

Emily

Stages in a Project

Explain the process for each of these stages.

- Allocate tasks
- Agree to do tasks
- Offer to do something
- Decline to do a task
- Summarize

Do you prefer to lead a project or just be part of the project team? Apart from the tasks mentioned here, what other tasks need to be considered?

Leader or team player?

📋 Do you prefer to lead a project or just be part of the project team?

When you think of projects, you might think of something quite complicated and extensive, like a new office project.

But in fact, most of the tasks we do in business are part of a project.

Even something as simple as writing a proposal is a project in itself: First you **collect data**, then you analyze and evaluate the data before **writing a draft**.

Finally, you edit the draft and **present a final version**.

Knowing how to refer to different elements of a project and describe them with interesting collocations is important for everyone involved in business today.

Today we learned...

- ✓ To develop fluency when talking about projects.
- ✓ To reinforce expressions we use to give and ask for suggestions.
