● USING THE PLATFORM

You will never appear on the screen.

Attendees

← To see the names of your classmates.

Chat

← To communicate with the class or teacher.

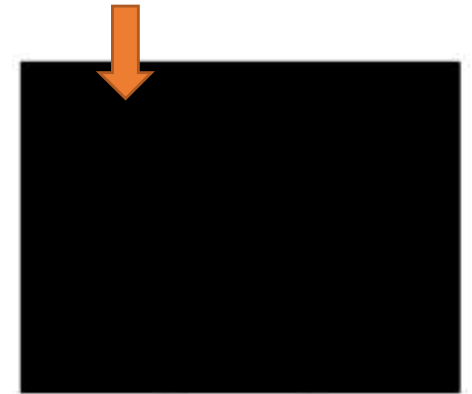

← To raise or lower your hand.

Exit

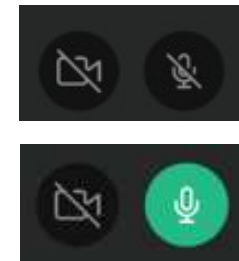

← To leave the class at the end.

Muted / unmuted.

Muted / unmuted.

→ Your camera will NEVER be turned on.

THIS LESSON IS ABOUT:

- SMALL BUSINESSES

Hi! How are you?

- What would you like to tell us about yourself?
- What do you enjoy the most about learning English with Campus Live?
- Are you satisfied with your improvement so far?

Starting Point

✓ Read and analyze the quote.
Discuss the takeaway.

✓ Read the quote. What does the author imply in the phrase “big things”?

The biggest mistake a small business can make is to think like a small business.

~ Aruna Bhayana

**There's nothing wrong with staying small.
You can do big things with a small team.**

Jason Fried, Founder & CEO of Basecamp

In this lesson...

We will focus on speaking fluency around analysis and discussion; however, we'll also focus on speaking accuracy around an important feature of pronunciation: *stress in words and sentences*.

- ✓ What does "stress" mean in phonetics?
- ✓ Why is it important for pronunciation?

Stress

Read and analyze. You will focus on sentence stress and word stress throughout the lesson.

Sentence stress is accent on certain words within a sentence.

Content words are the key words of a sentence; they are the important words that carry the meaning or sense—the real content.

Structure words are not very important words. They are small, simple words that make the sentence correct grammatically. They give the sentence its correct form—its structure.

Example:

Imagine you receive this telegram message:

Sell car gone France

The sentence above is not complete. It is not a "grammatically correct" sentence. But you probably understand it. These 4 words communicate very well.

- ✓ Add the structure words so that the sentence is grammatically correct. Repeat the sentence, adding the stress only and specifically to the content words.

Word stress is accent on one syllable within a word.

Native speakers of English use word stress naturally. Word stress is so natural for them that they don't even know they use it. Non-native speakers who speak English to native speakers without using word stress, encounter two problems:

- They find it difficult to understand native speakers, especially those speaking fast.
- The native speakers may find it difficult to understand them.

Example:

poLICE / /pə'lis/

Growing Small Businesses in the US

Read out loud and focus on sentence and word stress. Then, read again whether out loud or silently, to analyze the text. Finally, discuss the question.

A small business is defined as a business (corporation, limited liability company or proprietorship) with 500 employees or less. According to the U.S. Small Business Administration (SBA), small businesses represent 99.9 percent of all U.S. businesses. Small businesses created 1.9 million jobs in 2015 with some of the smallest firms - those with 20 employees or less - adding over half of the positions with a 1.1 million increase. As of 2018, the SBA estimates there are 30.2 million small businesses employing a total of 58.9 million workers.

✓ Do you think that these numbers have changed as of 2020, when the COVID-19 pandemic began? How? Justify your answer.

Employing Local Workers

Read out loud and focus on sentence and word stress. Then, read again whether out loud or silently, to analyze the text. Finally, discuss the questions.

- Can you think of an example where a small business has brought growth to your community?
- Can you think of an example where a large corporation has depended on a small business for any purposes?

Small businesses contribute to local economies by bringing growth and innovation to the community in which the business is established. Small businesses also help stimulate economic growth by providing employment opportunities to people who may not be employable by larger corporations. Small businesses tend to attract talent who invent new products or implement new solutions for existing ideas. Larger businesses also often benefit from small businesses within the same local community, as many large corporations depend on small businesses for the completion of various business functions through outsourcing.

Adapting to Changing Climates

Many small businesses also possess the ability to respond and adapt quickly to changing economic climates. This is due to the fact that small businesses are often very customer-oriented and understand the needs of the community. Many local customers remain loyal to their favorite small businesses in the midst of an economic crisis. This loyalty means that small businesses are often able to stay afloat during tough times, which can further strengthen local economies. Small businesses also accumulate less revenue than larger corporations, meaning they may have less to lose in times of economic crisis.

- ✓ Why else do you think small businesses adapt quickly to changing economic climates?
- ✓ Do you second the last statement *"small business may have less to lose in time of economic crisis"*? You can take the COVID-19 pandemic as an example.

Contributing to Local Government with Taxes

Read out loud and focus on sentence and word stress. Then, read again whether out loud or silently, to analyze the text. Finally, discuss the questions.

When consumers patronize local small businesses, they are essentially giving money back to their local community. A thriving local business will generate high levels of revenue, which means that the business will pay higher taxes, including local property taxes. This money is then used for local police and fire departments as well as schools. A thriving small business also can improve property values throughout a community, improving every homeowner's bottom line while generating more property taxes for local governments.

The small business impact on local economy growth also takes the form of sales tax collection. Local businesses charge sales tax based on their location and can be the backbone of special taxation districts focused on unique projects, such as lighting and sidewalk projects to improve historic shopping districts and attract additional customers.

- ✓ US Congress has suggested raising taxes and adding new tax mandates, do you think this would be problematic to small businesses? Justify your answer.
- ✓ What can be a good way to reduce taxes for your small business?

Growing a Small Business to a Corporation

Read out loud and focus on sentence and word stress. Then, read again whether out loud or silently, to analyze the text. Finally, discuss the questions.

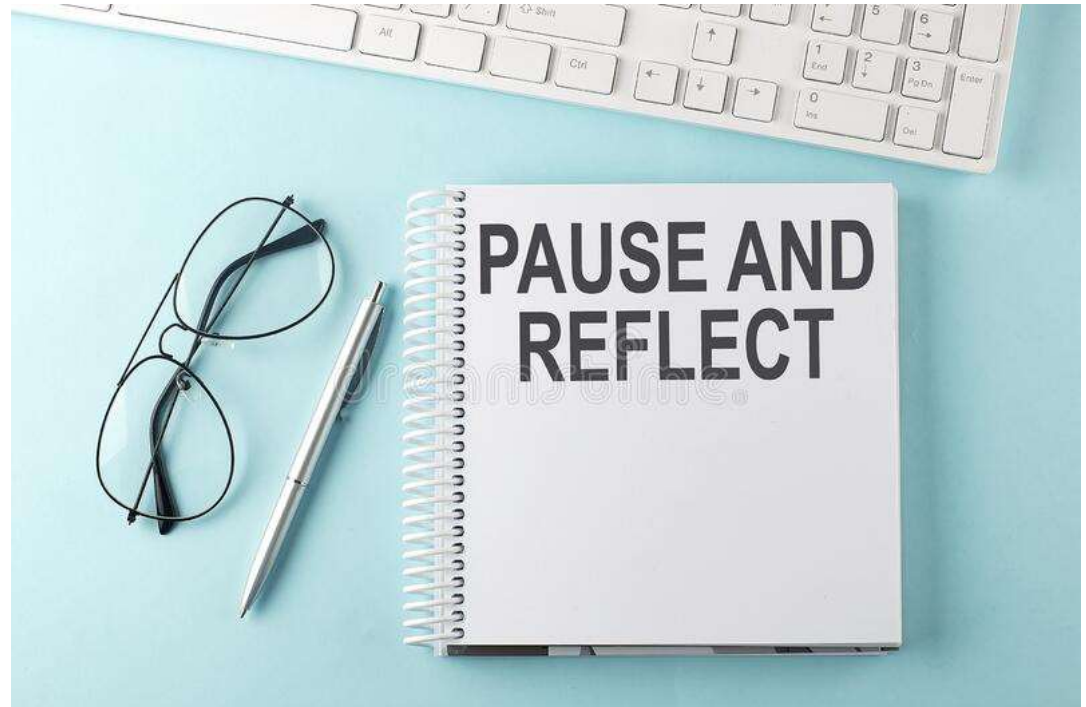

Small businesses do not always stay small. Large corporations, such as Nike and Ben and Jerry's, started off as small businesses and grew to become major players in the national and international marketplace. Many computer-industry leaders began as "tinkerers," working on hand-assembled machines out of their garages. Microsoft and Amazon are prime examples of how a small business idea can change the world. Small businesses that grow into large businesses often remain in the community in which the business was first established. Having a large corporation headquartered in a community can further help provide employment and stimulate the local economy, creating a market that favors the development of additional small businesses.

- What does it take for a small business to grow into a large one?
- What do you think are Bill Gates (Microsoft) and Jeff Bezos' (Amazon) characteristics as major players in their now powerful businesses?

Reflect

- How did you feel about the conscious use of word and sentence stress throughout the lesson? Was it easy? Difficult? Awkward?
- Overall, what's your general idea of a successful small business?

Today we learned...

- ✓ To understand small businesses as the building blocks of largest corporations.
- ✓ To use word and sentence stress in a controlled practice.
- ✓ To develop speaking fluency through reading comprehension and small discussions.

● SMALL BUSINESS. BIG VOICE

THANK YOU!!
