

WELCOME TO CAMPUS LIVE

● USING THE PLATFORM

You will never appear on the screen.

Attendees

← To see the names of your classmates.

Chat

← To communicate with the class or teacher.

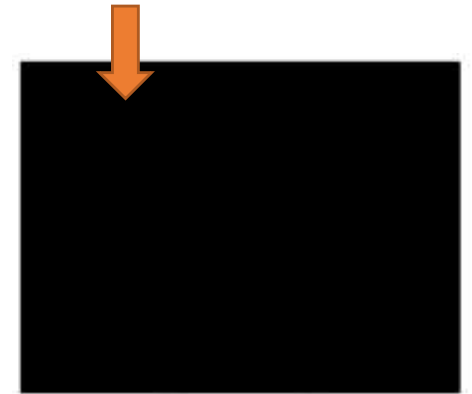

← To raise or lower your hand.

Exit

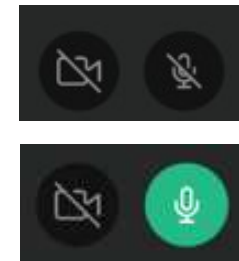

← To leave the class at the end.

Muted / unmuted.

Muted / unmuted.

→ Your camera will NEVER be turned on.

THIS LESSON IS ABOUT:

- THE CURIOUS PATH TO INDUSTRY 4.0

Welcome Back

- ✓ Introduce yourself. Tell us your name, nationality, occupation, etc.
- ✓ What do you know about IoT?
What is the Internet of Things?
- ✓ What do you know about Industry 4.0?

What is Industry 4.0?

Order the words to form a brief definition of Industry 4.0. Use the chat to write the definition.

the
intelligent

Industry 4.0

processes
for

industry with

machines
and

the help of

communication
technology

information
and

refers to

networking of

Paraphrase the Definition.

Look at the example. Change the underlined words for synonyms.

Industry 4.0 is the digital transformation of manufacturing and related industries and value creation processes.

Industry 4.0 is the electronic transformation of production as well as related industries and value invention processes.

- Industry 4.0 is a vision that evolved from an initiative to make the German manufacturing industry more competitive ('Industry 4.0') to a globally adopted term.

Match the verbs with their meaning.

Analyze these words and their meaning. Match and explain.

1. paraphrase
2. summary
3. inference
4. quoting

- a. A brief statement or restatement of main points, especially as a conclusion to a work.
- b. to speak or write (a passage) from another usually with credit acknowledgment
- c. a restatement of a text, passage, or work giving the meaning in another form
- d. a guess that you make or an opinion that you form based on the information that you have

4 R's of Paraphrasing

Match, read and explain.

1. Reword
 2. Rearrange
 3. Realize
 4. Recheck
- a. Some information (names, dates, titles, etc.) can't be changed.
 - b. Can you replace any words with synonyms?
 - c. Did you include the important information? Does it make sense?
 - d. Can you move some words or phrases around?

Use the 4 R's to Paraphrase this Definition.

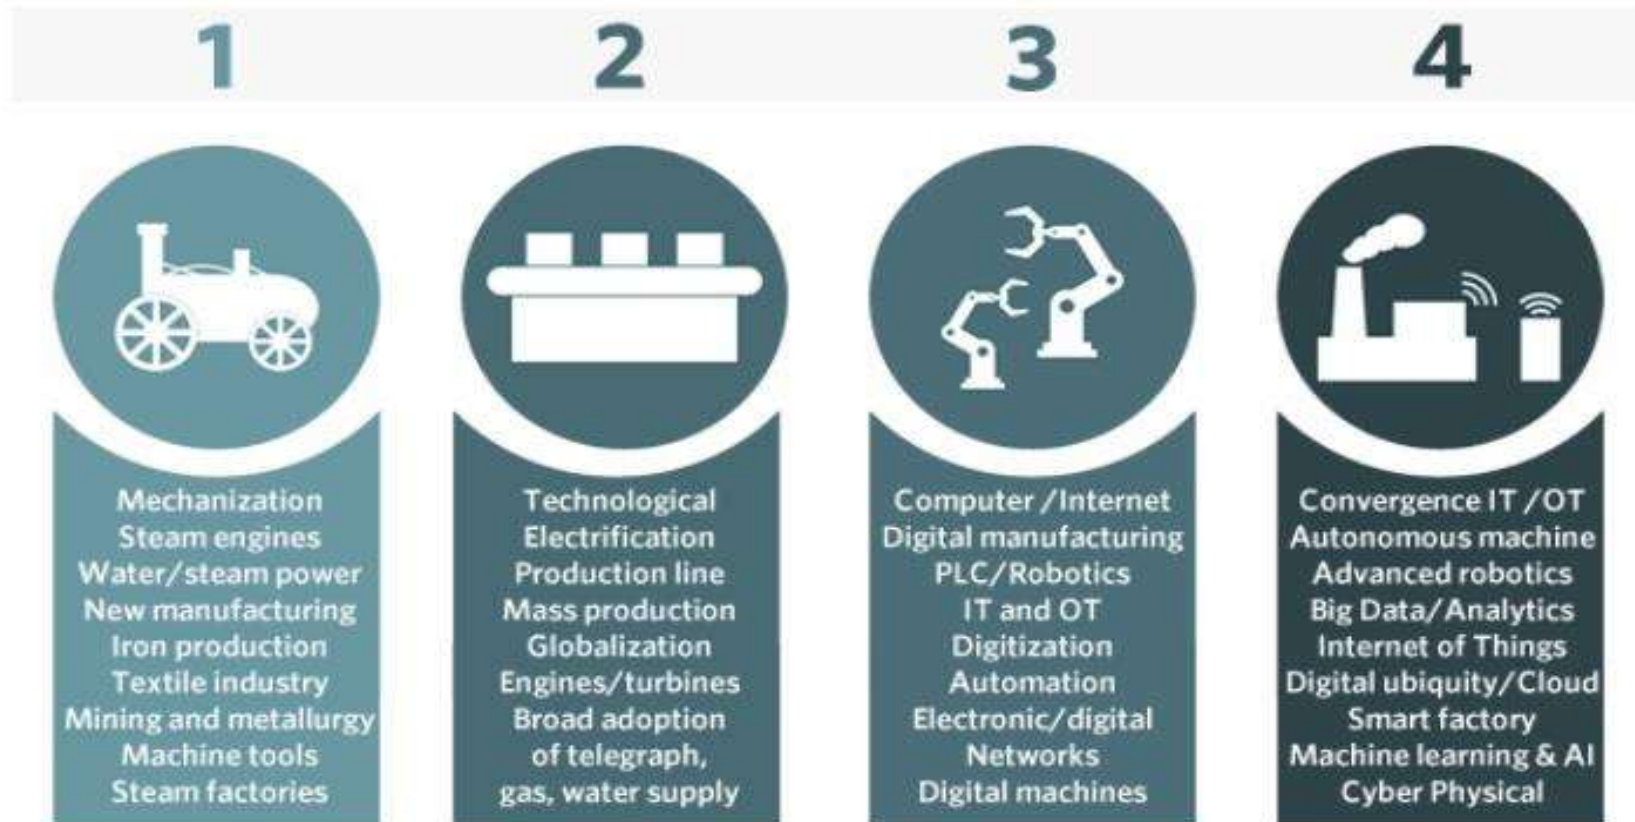

Notice: *reword*, *rearrange*, *realize*, *recheck*.

Industry 4.0 *has been defined as* “a name for the current trend of automation and data exchange in manufacturing technologies, including *cyber-physical systems*, the *Internet of things*, cloud computing *and* cognitive computing and creating the smart factory”.

Industry 4.0 – Digital Transformation of Manufacturing in the fourth Industrial Revolution

Read aloud and explain.

FROM INDUSTRY 4.0 TO FOURTH INDUSTRIAL REVOLUTION

Paraphrase the explanation.

Infer unknown words from context.

Industry 4.0 is often used interchangeably with the notion of the fourth industrial revolution. It is characterized by, among others; even more automation than in the third industrial revolution, the bridging of the physical and digital world through cyber-physical systems, enabled by Industrial IoT, a shift from a central industrial control system to one where smart products define the production steps, closed-loop data models and control systems and personalization/customization of products.

Topics within Industry 4.0

Match.

1. Similarly stored, but not yet comprehensively implemented due to the size and scope of the different production facilities. In the future, automation will play a particularly important role in Industry 4.0.
 2. Thanks to newer and faster systems and artificial intelligence and algorithms, data will hardly be accessible to humans.
 3. This is the networking and control of digital solutions and various products directly via the Internet. This is already partially established today, but will continue to grow significantly in the context of Industry 4.0.
 4. This is already being used successfully in many companies and offers the possibility of using many services independently and flexibly. The Industry 4.0 platform is already improving existing and future offerings by establishing various standards in the area of digitization.
- a. Internet of Things (IoT)
 - b. Industrial internet of Things
 - c. Cloud Computing
 - d. Big Data

Features of the New Industrial Revolution

Explain the characteristics.

- Flexible production
- Flexible production environment
- Optimized logistics solutions
- Conservation of resources
- Clear customer orientation
- Effective use of all data

Digitization as the Basis for Success

After reading, summarize the extract.

The concept of digitization plays a very special role in the context of Industry 4.0. After all, **digital data** is the key to success in future production. This applies on the one hand to the data collected from the customers and in parts also from the products, but above all also to the data within a production cycle. In the future, it will be the case in many production plants that, for example, the individual components will already contain data and information. In this way, the product can communicate with the manufacturing machine within the framework of a production line and inform it, for example, of the product for which this workpiece is planned. In this way, digitization can be used, for example, to design production lines that can simultaneously produce different variants of a particular product in a single operation. As a result, digitization allows **precise control of production processes** in Industry 4.0 and a significantly leaner and **more effective production process**

Comprehension Check

Draw up questions regarding the extract, using the prompts, invite a classmate to answer your question.

- What / happen / future / digital / data / ?

- What / key to success / future production / ?

- What / digitization / used for / ?

- What / digitization / allow / industry 4.0 / ?

Today we learned...

- ✓ To read information and paraphrase it.
- ✓ To pick out the important parts of a text.
- ✓ About Industry 4.0 features and roles.
- ✓ To differentiate, analyze and use three different tenses indirectly; past, present and future simple.

● INDUSTRY 4.0

THANK YOU!!
